HOB UNITS

MODEL: S2H

MODEL: S4H

TELEPHONE: SERVICE (44) 01332 875665
FAX: SERVICE (44) 01332 875536

WARNING - To avoid scratching the highly polished exterior surface of this equipment whilst in transit; the protective film on the exterior surfaces has **not** been removed.

It is **important** that this protective film is peeled off before the equipment is used.0

PLEASE NOTE INSTALLATION OF BOTH UNITS MUST BE CARRIED OUT BY A QUALIFIED ELECTRICIAN

1. Ensure all controls are in the off position, then turn on the power supply.
2. Turn the appropriate energy regulator to the desired setting 3 for boiling and reduce to simmer, the red lamp for that particular hob will illuminate to indicate that there is power to the hob and that the hob is on.

For maximum efficiency use good quality pans of the correct size, as total coverage of the plate ensures any spillage will flow easily.

CLEANING

It must be accepted that due to the heat involved the outer rings may taint and this will not be able to be removed altogether this can be reduced by not having the hobs on full power for prolonged periods.

Use hot soapy water or a non abrasive hob cleaner.

FAULT FINDING

The most common fault is that the unit is not connected to the mains supply, and so the mains lamp will not illuminate, in this circumstance please try the following before calling for service assistance.

1. Check the unit is plugged into the mains supply and the socket is switched on
2. If the unit has been permanently connected to a fused switch ask a qualified electrician or competent person to check the connections.

One of the above may cure your fault, if not contact your distributor.

RATING: S2H 5.2kw 22A 240V or 11A, 11A 3~N 240V
S4H 10.4kw 44A 240V, or 22, 11, 11A 3~N 415V

Parry Catering recognises our obligations to the EU DIRECTIVE covering the waste disposal of electrical and electronic equipment (WEEE), Parry Catering are committed to this policy in order to help conserve the environment.

At the end of this unit's life you **MUST** dispose of it in an approved manner. You **MUST** not discard the unit or place it in the refuse bin.

You have several options:

- a) Take the unit to an approved WEEE scheme company, there will be one in your area.
- b) Take the unit to an approved waste disposal site; many sites are managed by your local authority.
- c) Contact the unit's manufacturer, importer or their agent the contact details will be on the unit.

There will probably be a charge for this service which will depend on the physical location of the unit and size you will be given a collection price for a curb side collection based on commercial rates prevailing at the time.

It should be noted that the unit to be collected should be suitably packed and sealed to prevent dangerous gases and fluids from escaping. The condition of the unit must also be clean to comply with health and safety regulations.
