

# OPUS COMBI STEAMERS

Introducing the new **Opus CombiMaster® Plus**, the same great combi: rich in features, yet low on cost, **now with automatic cleaning!**

## Automatic cleaning

It doesn't get any easier than this. With the new automatic cleaning function, the Opus CombiMaster® Plus is ready to use again very quickly. Choose the necessary cleaning cycle from a choice of three automatic programmes and insert the tablets displayed – that's it. It virtually cleans itself, overnight too if required. The automatic cleaning function ensures hygienic cleanliness and an optimally maintained unit at all times.

- Solid care tablets eliminate the need for liquid cleaning agents – safe and convenient.
- Cleaning times to your convenience – cleaning can take place unsupervised, overnight if desired.
- Economical – you only need a little power, chemicals and water, and above all you will save on working time.

## The new compact Opus CombiMaster® Plus XS

Introducing the new Opus CombiMaster® Plus XS – a compact, 6 x GN2/3 unit with the same features and performance as the larger GN1/1 and GN2/1 models.

The details that make the difference (**Opus CombiMaster® Plus XS model only**)\*:

### LED lighting

LED lighting provides neutral illumination of the cooking cabinet. Flashing LEDs indicate when the cooking process has finished. This lighting is energy-saving, durable and low maintenance.

### Cooking cabinet door with triple glazing

Triple glazing, with a cutting edge heat reflection coating, ensures minimal heat loss, saving up to 10% in energy costs.

Unlike many other compact combi steamers, the control panel for the Opus CombiMaster® Plus XS is conveniently situated to the side of the door – within easy reach and protected from escaping heat and steam.

You can site your Opus CombiMaster® Plus XS on a counter top or on optional wall brackets and floor stands.

Combining the XS model with a matching UltraVent fume and condensation hood, the XS model can also be built into your installation, saving space in even the smallest kitchen.

For ultimate flexibility and space saving, the Combi-Duo option allows you to mount one XS model above another.

Whether it is used as an attractive front of house unit or as an additional station unit, the new Opus CombiMaster® Plus XS is the perfect solution where space is at a premium.

\*all other OCMPC model sizes feature halogen lighting and double-glazed doors.

# Opus CombiMaster® Plus

- Four cooking modes: hot air cooking, steam cooking, combination cooking and Finishing®
- ClimaPlus® control of the cabinet humidity for perfect results
- Programming function - create and store 50 programmes with up to six steps
- Precise core temperature probe
- New! 3 automatic cleaning programmes
- Hand shower with automatic retracting system
- Saves time and money on energy and raw materials
- Halogen lighting and double glazed doors
- Now also available in a smaller size, the Opus CombiMaster Plus® XS. This is available as an electric version only, with LED lighting and a triple glazed door
