

PROD 06SVII

Pro Series 6 Professional Dryer
Stainless Steel with Titanium Panel

SENSING THE DIFFERENCE

KEY FEATURES

- 6kg large capacity
- Guaranteed for commercial use
- Sensidry Automatic sensing system
- Temperature sensor
- Vented dryer
- Coin-op ready
- Stainless steel drum and bulk head
- Double lint filter
- Removable fan for easier cleaning
- LED water container and filter full indicators
- Stacking kit option AMC973 (80 03437 798016)
- Optional pedestal
- Butterfly drying action
- Easy control
- Ball bearing support
- KidSafe

KEY BENEFITS

- Space to dry your entire wash load
- Ideal for heavy domestic use (football mums) and small businesses with space limitations, pubs, clubs, hairdressers, nursing homes etc...
- Patented system that measures the relationship between humidity and temperature which gives more accurate sensing than traditional sensor dryers
- Select low temperature and the sensor will maintain a stable low temperature ± 1 degree C for safer fabric care on delicates
- Easy installation, standard 100mm outlet
- The machine is prepared ready to connect to an external coin-op or smart/chip card system
- Higher quality, stronger and better corrosion resistance
- For more efficient lint collection which means less lint build up in the machine - a safer and more efficient drying performance
- If any lint does get past the double lint filter and builds up around the fan in very heavy use, there is no need to call an engineer, simply remove the fan and clean yourself
- Automatically informs you when it needs emptying
- Allows matching dryer to be safely stacked on the washer - saving valuable space
- 2 versions available: open style or with drawer for extra storage space for laundry consumables
- Tumbles in a figure of 8 pattern due to the unique paddles, meaning no need to reverse tumble which speeds the drying process and is less stressful on the motor and drive components
- 8 auto programmes built in - press the programme button and start (11 language options)
- Others may use plastic drum front bearings but using ball bearings greatly increases the durability and life of the product
- Start delay programme - if a child climbs into the drum and closes the door it will not start immediately

WEIGHTS AND DIMENSIONS

Dimensions (h x w x d) mm	850x595x595
Packed	910x625x695
Weight (kg)	39
Packed	40
WEEE Directive	Class 1

TECHNICAL DATA

Availability	June/July 09
12 NC	8575 905 10000
EAN Code	8003437970207
Available in	Stainless Steel with Titanium Panel
Predecessor model no.	HDD 06SC WG
Power supply	230V/50Hz
Fuse Ampere	10A
Heating power (watts)	2500
Photo reference	
Type	Vented

FABRIC CARE PROGRAMMES AND OPTIONS

No of programmes	8 pre-set programmes
------------------	----------------------

TIME MANAGEMENT

Sensing system - automatically adjust the time depending on the load
Sensor automatically stops drying on achieved desired dryness
Programme status indicator
Large condenser for quicker drying
No need to reverse tumble so shorter drying times

CONVENIENCE

6kg extra load capacity - space to dry your entire wash load
Simple user interface - press the programme button and start
Large opening for ease of loading/unloading
Prepared for coin op/smart card
Easy access front filter
Auto anti-crease - releases creases, saving you effort when ironing
Auto cool down phase - remove garments ready to wear
Stacking kit option - comes with stacking kit as standard

PERFORMANCE

Energy efficiency	C
Noise level db(A)	65
Consumption (based on 5kg cotton cupboard dry)	
Energy/programme	3.5

OTHER KEY FEATURES

Butterfly drying
Stainless steel drum and bulk head - heavy duty, durable, high quality material
