

# REFRIGERATED BUFFET DISPLAY

MANUAL OF INSTRUCTIONS FOR USE AND INSTALLATION

# SAFETY

It is the responsibility of the owner of this appliance to ensure that all safety rules contained within this manual are strictly adhered to. Failure to do this could result in permanent injury or even death.

The manufacturer accepts no responsibility for any damage, injury or loss as a result of not complying with the following safety instructions.

The manufacturer will accept responsibility for any damage, injury or loss arising from faults in the manufacture and assembly of the appliance. In cases where the equipment is defective, please refer in the first instance to your supplier

**WARNING:** This sign indicates that the instructions **MUST** be followed correctly or there is an increased risk of damage or injury

**CAUTION:** This sign indicates immediate risky conditions should the safety advice not be followed correctly

**DANGER:** This sign indicates a high risk of danger should safety instructions not be applied correctly. Attention must be paid at risk of injury or material damage

**DANGER:** High risk of electrical shock in this area, all necessary precautions must be taken.

**Equipotential connection terminal** – If necessary it must be connected to other equipment to realise the potential.

## TECHNICAL DATA

MODEL	DIMS (HxWxD)	CURRENT	HP	SUPPLY	WEIGHT (Kg)	AREA M <sup>3</sup>	GAS R134a
<b>GB3</b>	1320 x 1190 x 900	3.5amp	3/8	230v	110	1.19	130g
<b>GB4</b>	1320 x 1190 x 900	3.5amp	3/8	230v	125	1.62	130g
<b>GB6</b>	1320 x 2180 x 900	3.5amp	1/2	50Hz	190	2.58	130g

## TRANSPORTATION AND INSTALLATION

During transportation, take necessary precautions to ensure that the unit is secured correctly, reducing the risk of toppling or getting damaged in transit

Site the unit on a flat and even surface

Do not install near flammable or explosive materials. In order to ensure the unit runs correctly, avoid positioning in direct sunlight, or any other intense heat sources such as ovens or radiators.

## INSTRUCTIONS

The users accept to conform with the requirements included in the user manual, failure to do so will result in the warranty being invalid. The user also accepts that they have been informed about the limited guarantee liability, at the beginning of this manual.

### BEFORE INSTALLATION

- Ensure that no person or living body be placed on or in the unit
- Do not allow children or any other unauthorised person to operate the machine
- Ensure that the unit has been disconnected from the electrical supply before cleaning or maintenance
- Ensure that the unit is suitably earthed before connecting to the power supply
- After maintenance, ensure all covers and grills have been replaced before putting the unit into operation
- The units, nor the canopies should be used as a ladder or step up in any circumstances

## INSTALLATION

- Remove the unit from its packaging, ensuring all components are accounted for. If the unit is incomplete in any way, please contact your supplier immediately
- Site the unit on a flat and even surface, using the adjustable legs to ensure the unit is even and balanced
- After a suitably qualified person has ensured the machine is properly earthed, connect the unit to the energy supply.

**THIS MUST BE CARRIED OUT BY A  
SUITABLY QUALIFIED PERSON!!**

**Your unit is now ready for use**

## STARTUP

- Before startup, ensure the electrical connection is sound and has been checked by a suitably qualified engineer to ensure the correct current as stated in TECHNICAL DATA has been supplied
- Ensure that the drain has been fitted and secured properly to a waste water outlet by a suitably qualified person
- Turn on the devices by pressing the '**B**' button, the main switch for the unit and the lamps
- Turn the '**C**' button to the **1** position and then adjust the thermostat to the required temperature
- Whilst the unit is in operation, ensure the area is clear of any flammable material (Napkins, plastic bags, clothing etc)
- Once the thermostat light goes out, the unit has reached the desired temperature

A – Main cord  
B – Lamp Switch  
C - Thermostat

## **MAINTENANCE & CLEANING**

To ensure you continue to get the best out of your machine and prolong it's life, it is recommended that you have it serviced on a regular basis by a suitably qualified engineer. It is also important that you maintain the following cleaning instructions

- Ensure the unit is disconnected from the electrical supply before commencing cleaning
- Do not use hoses, pressure washers or water to clean the unit
- Wipe the machine thoroughly with a soft cloth damp and a non abrasive detergent solution
- Do not use any abrasive scourers or scrapers to clean the surface, this could cause irreparable damage
- When using detergent solutions, always wear rubber gloves for protection
- Do not remove the labels or panels from the unit, they may contain important information

**FOR ANY OTHER SERVICE, MAINTENANCE OR REPAIRS,  
CONTACT YOUR SUPPLIER IN THE FIRST INSTANCE**

**Always ensure work is carried out by a suitably qualified  
engineer**
