WASTE COMPACTOR

Mini Compactor Series

The compact IMC Mini Compactor series with its modern and stylish design looks good in any commercial establishment. The MC400CC also incorporates a dynamic can crush which compresses drinks cans and food tins to as little as a sixth of their original size.

Key features

- Disposal of all your recyclable plastics, food packaging waste, drinks cans, food tins, paper, card and glass - all in one convenient appliance
- Optimised to encourage recycling by offering one-stop segregation of waste
- Near silent 6000Nm linear motor ensures energy efficient and quiet operation
- Unique compaction mechanisms allow storage of real world quantities of cans, tins, card, plastics and other packaging waste
- IMC's 'hypercrush' compaction operation ensures permanent compression of plastics and card
- All our products offer seamless and full under counter integration
- Our range is designed with alternative combinations of functionality to address different municipal authority waste collection regimes
- Stainless steel chassis ensures a rugged construction
- Safety features including key lock

Start saving...

By using an IMC Mini Compactor you save:

- On waste collection costs
- On employee time due to less bin emptying
- No unsightly mess or smells

Why buy an IMC Mini Compactor?

Are you amazed by the amount we all throw away each day? We are, and recycling is the answer!

Recognising that dealing with waste is an unavoidable nuisance, here at IMC we have spent many hours considering how to help and encourage you to increase your recycling rate.

The result is our award winning range of recycling compactors that have been designed to facilitate recycling whilst retaining the convenience of a traditional trash compactor. We have combined the opportunity to pre-sort waste with a compaction mechanism to make best use of available space.

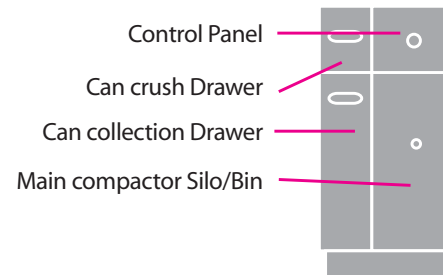

At IMC we understand that as well as helping you recycle, a compactor needs to save you money. Not only do your customers want to see a clean and tidy environment, but you want the bar, kitchen, cafe and so much more, to run smoothly and efficiently. The payback on a compactor is less than 3 months on direct savings and 7 months purely on saved collection charges alone.

Did you know?

That everything you put into a traditional 'rubbish compactor' cannot be recycled due to the compaction force, contamination and the resultant difficulties when it comes to separating the waste for future reuse? IMC has overcome these issues by:

- Offering appliances that allow you to sort and store your differing waste types at the point of disposal
- Optimising our crushing mechanisms to maximise storage capacity without inhibiting separation of waste for future reuse.
