autonumis

Independently tested and approved to the Government's
Enhanced Capital Allowances scheme (ECA)

THE THREATS:

SHARP UTILITY PRICE HIKES...

suddenly and unilaterally imposed several times a year

SPIRALLING ENERGY COSTS

have doubled in the past 12 months

STILL MORE RISES YET TO COME

driven by highly volatile oil prices

YOUR PROFITS UNDER THREAT...

energy costs threaten your profits and stability

THE SOLUTION:

NEW ECOCHILL BOTTLE COOLER RANGE

new low-energy bottle coolers from Autonumis – the UK's #1 manufacturer

30% ENERGY SAVINGS – OR MORE

compared with standard coolers of similar performance

ADVANCED COMPRESSOR & CONTROL TECHNOLOGY

optimises compressor start and run conditions, extends compressor life

SIGNIFICANT ENVIRONMENTAL SAVINGS

results in reduction of CO2 released into the atmosphere

autonumis **EcoChill**
bottle coolers:

- ▲ offer power savings in excess of **30%** compared with standard coolers of a similar performance
- ▲ use advanced RSD compressor technology and sophisticated electronic controls for optimal starting
- ▲ feature permanent magnet DC motor drives and maximise the output from high-efficiency compressors
- ▲ extend compressor life through favourable operating conditions so your cooler lasts longer!

autonumis

ACTUAL DIMENSIONS

Always leave a 25mm air gap between the top of the cabinet and underside of the bar

autonumis **EcoChill**
bottle coolers feature:

- ▲ generous internal capacity, with adjustable shelving, for 3 layers of premium beers
- ▲ controlled internal air flow control for excellent cold air distribution
- ▲ sleek and eye-catching styling – making a statement in any bar
- ▲ new lighting aesthetics, with 'easy-reach' controls, for optimum product display
- ▲ genuine stainless steel door option for stunning good looks
- ▲ reverse-ducted condenser fan for enhanced refrigeration life & dust control
- ▲ single, 3ft double or maxi-double cabinets available, with optional wine shelving

A REVOLUTION IN REFRIGERATION TECHNOLOGY

A revolutionary new technological innovation offers hope to the embattled pub industry. Autonumis, a major player in the UK bottle cooler market for the past 15 years, has scored another 'first' with the introduction of the new EcoChill range of low-energy bottle coolers. On-site tests showed power savings in excess of 30%. These

impressive results provide a typical payback of less than two years at 6p/Kwh. From an environmental aspect the savings are also highly significant. Under normal working conditions, just one new EcoChill unit will save 475 kg (nearly half a tonne) of CO₂ from being released into the atmosphere – every year!

Find out more about how you can slash your energy bills.
