### INSTALLATION

These Instructions contain important information designed to help the user obtain the maximum benefit from their investment.

Please read them carefully before starting work and consult with your distributor/supplier in the event of any queries.

Be sure to leave this Instruction Manual with the user after installation of the machine is complete, or in a safe location.

### Procedure

#### WARNING

The following table shows the weight and the minimum quantity of people required to lift the unit:

	Net Weight	Quantity of People
F63/250	12.2kg	1
F63/251	9.5kg	1

Before use; remove all packaging and ensure that the unit is checked over for damage, any damage must be reported to the carrier or distributor/supplier immediately.

Remove any protective plastic coating on the unit.

### Location

The Hand Sanitising Station is only suitable for use where there is no risk for the unit to be adversely affected by its surrounding environment.

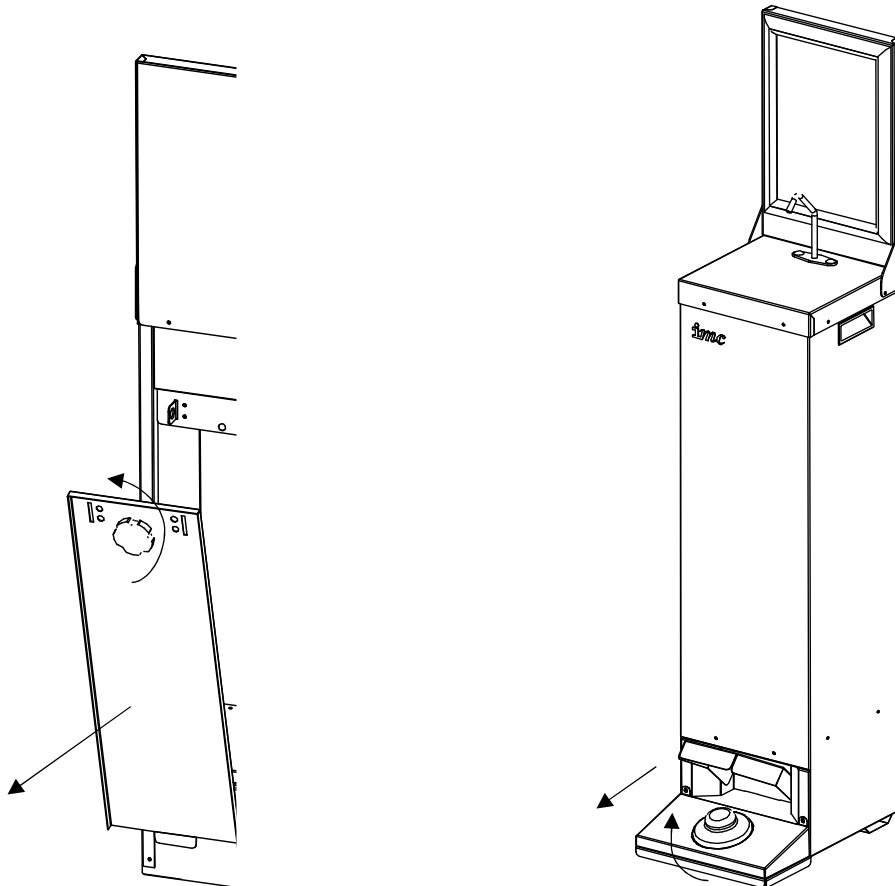

The unit must be stationed on a flat surface capable of safely supporting the units weight when fully laden with sanitiser.

The unit is fitted with a handles on the side to assist when moving.

## HAND SANITISING STATION

### Commissioning

Remove the rear panel by unscrewing the black knob on the back of the unit, tilt the panel backwards and pull upwards away from the unit at an upward angle. This will enable the operator to gain access to the suction hose and place a suitable containers inside the unit.

Once the rear panel has been removed, fit the suction hose pipe into the sanitiser container. Place the container on to the inner base panel. Note the suction tube is suitable for 5 litre containers.

The rear panel can now be refitted. Note there are two securing brackets through the back panel. These can be used to secure the back panel and the unit if being left unattended.

To prime the pump remove the pump cover panel. To do this lift upwards and away from the unit. Depress the foot pump several times until sanitiser is seen coming out of the dispense spout.

Once all of the above steps have completed the pump cover panel can now be refitted, your station should now be ready for operation.

Note the pump cover is required to restricts the volume of sanitiser dispensed per operation. This should only be removed to prime the unit with sanitiser.

## HAND SANITISING STATION

### Emptying / Refilling

Once the unit has completed its total number of operations, the sanitiser container will need replacing or refilled.

To replace the sanitiser container, follow the steps outlined in the commissioning section.

### Cleaning

Clean the externals of the unit as required; using a damp cloth and an appropriate cleaning product.

***DO NOT USE CLEANING MATERIALS CONTAINING ABRASIVES OR BLEACHES.***
